POWERYE®

The image shows a large, modern interior space, likely a lobby or atrium of a building. It features multiple levels with glass railings and warm, ambient lighting. The ceiling is a key design element, with large, curved sections containing numerous small, star-like lights. Several thick, white cylindrical columns support the structure. The overall aesthetic is clean, minimalist, and contemporary.

BLE-ND

BLE-ND

BLE-ND is the brand name of the platform for Bluetooth Smart solutions. It is a new technology designed to create any RGB colour. The luminaires can be controlled wireless. Using a special app you can make your own group of luminaires and install them as you prefer.
